

One card — what the intern can finish

Shen Ruililin · 18 August 2026 · print with the long note if wanted · not a live-file paste

The monthly CHD/HF paper is an identification article. That is the intern-owned peak. I checked whether a public file could raise it. It cannot.

What this extract supports

132 months of first CHD/HF hospitalisation after first diagnosis among people with T2D and/or HTN. No admission cause. No stroke file. No still-at-risk person-time. Twelve contrasts; all $*q* > 0.19$. Cold days almost all sit in December–February. CHD hot nights exclude 1 only in specifications that include 2020–2023. Hogan’s weather paragraph already stands.

Diminishing returns

More encodings, cover letters, or hourly heat in my processing paragraph will not mint a primary. They groom the same 132 months.

What I actually downloaded

Public object	Grain	Why it is not our series
HA ipdpdd-en.json (809 rows)	Financial year × hospital	No month, no ICD, not a T2D/HTN first-event rule
DH 2023 disease-class CSV	One year; I00–I99 = 162,691 episodes	Episode basis, all hospitals, no cohort
CKAN inpatient search	One hit: C&SD 930-92087, quarterly	Throughput, not ICD first-events
HKO daily mean T, 2013	365 public days	Weather is not missing; the lock is Hogan’s definition

Guo et al. (2024) used HA emergency admissions **under licence**. Those data are not public. HA Form A (~HK\$15,000+) / Form B (~HK\$60,000+) and EHPDCL (DARE/EXPERT) require a local PI. I cannot sign the Undertaking.

What would raise the ceiling

- **Roro:** stroke file or a written “not available”; ICD / inpatient vs DAE / event dating; monthly still-at-risk person-time; 65–69 / 70–74 if disclosure allows.
- **Hogan:** write the HM23 / tail rules; say whether official monthly hot-night counts remain the encoding; endorse the live file before Professor Bishai is asked to bless it. You do not need to send another temperature CSV.
- **Professor Bishai:** no confirmatory primary on this extract (my recommendation); written dissemination; ethics note if needed; authorship; wait-for-stroke or submit identification now; whether you will open Form B / EHPDCL as PI.
